## Work History

2016-12 –  
2020-10

### Sr. User Experience Developer

*Sallie Mae Bank, Newton, MA*

- Built and managed accessible and responsive component library (built in React) for developers to grab code and view interactions created by UX.
- Worked closely with UX designers in creating wireframes, designs, and low fidelity prototypes.
- Built complex high fidelity - accessible and responsive - prototypes for stakeholders to view functionality and interaction.
- Built front end for Salliemae.com, code that was later passed onto engineering team.
- Observed user testing in the lab, and through [usertesting.com](#).
- Technologies used include HTML, SCSS, React, Javascript/jQuery (and other JavaScript libraries), Photoshop, IntelliJ and other IDEs, InVision, Sketch, Node, ADO, and GIT.

2015-10 -  
2016-11

### Web Developer, Consultant

*Empiramed Inc., Maynard, MA*

- Built responsive web application with bootstrap, HTML, and jQuery.
- Edited HTML, JS, and images for web application and corporate web site.
- Created design mockups in Photoshop for mobile application and web application.
- Designed icons in Illustrator and imported SVG into icomoon as fonts.
- Technologies used include HTML, CSS, Javascript/jQuery, Assembla, JIRA, SublimeText, Photoshop, Illustrator, SVN, in a JAVA environment.
